

KQX7001: RESEARCH METHODOLOGY

Assignment 2: Analysis of contents of a scientific research paper (literature review) (25%)

General Instructions:

- You will be analyzing the article given during Week 2

“Source emission contributions to particulate matter and ozone, and their health impacts in Southeast Asia”

- Each team member should find and contribute 1 relevant article related to the given article, resulting in a total of 5 or 6 additional articles depending on the number of team members
- Submission need to be done by group. Only 1 representative from group can do the submission. Submission must be done in ONE PDF file.

Specific Instructions:

1. Summarise the article using one the literature review tables that we learnt in class.
2. Using the information in your summary table, write a one-two-page (maximum of 2 pages) summary that compare the articles that your team selected.
3. Begin with an introduction that briefly introduces the selected articles and their significance.
4. Use the articles from the summary table to highlight the similarities and differences of the chosen articles
5. Conclude with your team observations that can be learned from the summary of literature review table.

Items to be submitted:

1. One literature review summary table (The given article must be included in the summary table. Each team member should find and contribute 1 relevant article excluding the given article).
2. One-two pages of summary of the literature review table (maximum of 2 pages ONLY)
3. Font style: Times Roman, Font size: 12, Line spacing: 1.0
4. Your assignment will be graded according to the following criteria:
 - Accuracy and completeness of information in the summary table. The summary table should be concise and not too long.
 - Clarity, organization, and depth of the one-page summary.
 - Demonstrate understanding of the published works and their significance.
 - Writing quality, including grammar, punctuation and spelling
